SECOND OUARTER REPORT ENDED 30 JUNE 2019

NOTES TO THE UNAUDITED ACCOUNTS - 30 JUNE 2019

2. Summary of significant accounting policies

The accounting policies adopted in the preparation of the interim condensed consolidated financial statements are consistent with those followed in the preparation of the Group's annual consolidated financial statements for the year ended 31 December 2018, except for the adoption of MFRS 16 Lease which is effective as of 1 January 2019. The Group did not early adopt any new standards, interpretation or amendment that has been issued but is not yet effective.

At the beginning of the current financial year, the Group and the Company have adopted MFRS 16: Leases. MFRS 16 will replace MFRS 117 Leases, IC Interpretation 4 Determining whether an Arrangement contains a Lease, IC Interpretation 115 Operating Lease-Incentives and IC Interpretation 127 Evaluating the Substance of Transactions Involving the Legal Form of a Lease. MFRS 16 sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to account for all leases under a single on-balance sheet model similar to the accounting for finance leases under MFRS 117.

MFRS 16 has been adopted by the Group as at 1 January 2019 using the modified retrospective method of adoption which measures the lease liabilities based on the present value of future lease payments calculated using the incremental borrowing rate and exchange rate at date of transition. Lease payments would be split into principal and interest payments, using the effective interest method.

Correspondingly, the right-of-use ("ROU") assets will be the present value of the liability at the commencement date of the lease, adding any directly attributable costs. The ROU asset will be depreciated on a straight-line basis over the shorter of the lease term and useful life of the leased asset.

The Group elected to use the transition practical expedient allowing the standard to be applied only to contracts that were previously identified as leases applying MFRS 117 and IFRIC 4 at the date of initial application. The Group also elected to use the recognition exemptions for lease contracts that, at the commencement date, have a lease term of 12 months or less and do not contain a purchase option ('short-term leases'), and lease contracts for which the underlying asset is of low value ('low-value assets'). As the modified retrospective method of adoption is applied, comparative figures are not restated.

3. Auditors' report on preceding annual financial statements

The auditors have expressed an unqualified opinion on the audited Group's statutory financial statements for the financial year ended 31 December 2018 in their report dated 28 March 2019.

4. Seasonality of operations

AirAsia X is primarily involved in the provision of air transportation services and thus, is subject to seasonal demand for air travel. Passengers carried recorded in the 2Q 2019 declined by 7% year-on-year ("YoY") at 1,455,052 passengers while Passenger Load Factor ("PLF") stood at 80%. This was primarily due to the airline optimising its route network by terminating non-core routes and redeployed capacity and frequency.

5. Unusual items due to their nature, size or incidence

There were no unusual items affecting assets, liabilities, equity, net income or cash flows during the current quarter and financial period.

6. Changes in estimates

There were no changes in estimates that have had material effect on the results of current quarter and financial period.

7. Capital and reserves

There was no issuance of shares during the current quarter. Total issued and paid up share capital as at 30 June 2019 is 1,534,043,217 (30 June 2018: RM1,534,043,217).

9. Segment reporting

Operating segments are reported in a manner consistent with the internal management reporting provided to the chief operating decision maker, which is the Group's Chief Executive Officer ("GCEO"). The GCEO considers the business from a geographical perspective. The operating segments have been identified by each Air Operator Certificate ("AOC") held under the AirAsia brand, and are categorised as Malaysia, Thailand and Indonesia.

The GCEO assesses the performance of the operating segments based on revenue and net operating profit.

Reconciliation to the reportable segments relates to the elimination of the associate and joint venture companies.

The segment information provided to the GCEO for the reportable segments are as follows:

30. Review of Group's performance

Performance of current quarter against the same quarter last year for Malaysia

The net operating loss for the group in 2Q19 was RM185.0 million as compared to net operating loss of RM99.2 million in 2Q18. The loss is mainly due to loss of disposal of 3 aircraft under sale and leaseback during the current quarter and weakening of Malaysian Ringgit against US Dollar.

(Company No. 734161-K)
(Incorporated in Malaysia with limited liability under the Companies Act, 1965)
SECOND QUARTER REPORT ENDED 30 JUNE 2019

NOTES TO THE UNAUDITED ACCOUNTS - 30 JUNE 2019

31. Variance of results against preceding quarter

The Group recorded a loss before taxation of RM269.3 million for the quarter under review as compared to profit before taxation of RM59.5 million in 1Q19. This was mainly due to the unrealized foreign exchange loss as a result of weakening of Malaysian Ringgit against US Dollar at end of the current quarter. In addition, there was a loss of disposal of 3 aircrafts under sale and leaseback during the quarter amounting to RM72.5 million. Results during the current quarter is weaker than the preceding quarter, which is in line with the seasonal pattern of the Group's business trend.

32. Other profit and loss items

In the current quarter and financial period, there has been no interest income, other income including investment income, interest expense, depreciation and amortisation, provision for and write off of receivables and inventories, gain or loss on disposal of quoted and unquoted investments or properties, impairment of assets, foreign exchange gain or loss, gain or loss on derivatives and/or exceptional items except as disclosed either in the consolidated income statements and/or notes to the unaudited financial statements.

33. Commentary on prospects

The Company recognises the challenges posed by the weakening of Malaysia Ringgit against US Dollars. The Company will continue to drive revenue and sale of ancillary services to mitigate higher operational cost from the factors mentioned above. Demand and load factors are expected to remain at a reasonably healthy level. However, it is worthwhile to note that average base fare is under pressure due to the increase in capacity on core established routes, in addition to new routes. The Board is also aware of the slowdown of growth in tourism sector, especially coming from the China and Korea market segments. Efforts have been made to mitigate this risk by shifting some of future capacity into other core markets. On the fleet planning front, while AirAsia X Thailand is adding up to five aircraft through operating leases in 2019, AirAsia X Malaysia is expected to remain with 24 aircraft as it focuses on maximising aircraft utilisation and realigning business model to ensure continued sustainability and commercial viability in the coming quarters.

Going into the second half of 2019, the Company foresees operational environment to remain challenging against global economy backdrop and pressure on Malaysia Ringgit. The Board is also concern on the implementation of departure levy with effective from 01 Sept 2019, which may potentially impact the demand for air travel especially when the third quarter is usually the leaner quarter for mid-to-long haul segment. The Company, however, expects fourth quarter 2019 to remain reasonably healthy as the management continues to push for efforts to mitigate cost pressures and remains committed to ensure sustainable growth amid these challenging circumstances.
