NOTES TO THE UNAUDITED ACCOUNTS - 31 DECEMBER 2019

2. Summary of significant accounting policies

The accounting policies adopted in the preparation of the interim condensed consolidated financial statements are consistent with those followed in the preparation of the Group's annual consolidated financial statements for the year ended 31 December 2018, except for the adoption of MFRS 16 Lease which is effective as of 1 January 2019. The Group did not early adopt any new standards, interpretation or amendment that has been issued but is not yet effective.

At the beginning of the current financial year, the Group and the Company have adopted MFRS 16: Leases. MFRS 16 will replace MFRS 117 Leases, IC Interpretation 4 Determining whether an Arrangement contains a Lease, IC Interpretation 115 Operating Lease-Incentives and IC Interpretation 127 Evaluating the Substance of Transactions Involving the Legal Form of a Lease. MFRS 16 sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to account for all leases under a single on-balance sheet model similar to the accounting for finance leases under MFRS 117.

MFRS 16 has been adopted by the Group as at 1 January 2019 using the modified retrospective method of adoption which measures the lease liabilities based on the present value of future lease payments calculated using the incremental borrowing rate and exchange rate at date of transition. Lease payments would be split into principal and interest payments, using the effective interest method.

Correspondingly, the right-of-use ("ROU") assets will be the present value of the liability at the commencement date of the lease, adding any directly attributable costs. The ROU asset will be depreciated on a straight-line basis over the shorter of the lease term and useful life of the leased asset.

The Group elected to use the transition practical expedient allowing the standard to be applied only to contracts that were previously identified as leases applying MFRS 117 and IFRIC 4 at the date of initial application. The Group also elected to use the recognition exemptions for lease contracts that, at the commencement date, have a lease term of 12 months or less and do not contain a purchase option ('short-term leases'), and lease contracts for which the underlying asset is of low value ('low-value assets'). As the modified retrospective method of adoption is applied, comparative figures are not restated.

33. Commentary on prospects

The Company foresees major challenges in the first half of 2020 posed by the recent coronavirus outbreak. The virus outbreak has had an adverse impact on the sale of passenger tickets at AAX, with the biggest impact in the Chinese market. However, sales have also been impacted in Japan, Korea and Australia and the Company will have to bear the cost of ticket refunds for passengers who have cancelled flights to China. The management of the Company is taking action to optimise cash flow and maintain continuity of operations. Passenger bookings in the forward months are also trending lower as a result of the outbreak which is impacting all tourism related businesses in the region. Fares are expected to be under pressure for the next couple of months as the Company tries to stimulate air travel demand on the back of the virus outbreak. In order to mitigate the aforementioned risks, the Company will launch extensive promotional campaigns and redeploy capacity into other core markets to counter the impact of the weak global economy as well as the virus outbreak. This strategy is aimed at stimulating price sensitive customers, maintaining a healthy load factor and supporting ancillary income. The Company is also actively monitoring all operational costs as we expect the headwinds to persist. In addition, the Management is doubling up efforts to review areas where the Company can improve its cash flow and futher cut costs. The Company has hedged 80% of its fuel requirement for 1Q 2020 at average Brent hedge prices of US\$59.8/bbl. For the remainder of the year, the Company has hedged 72% of the fuel requirement at average Brent hedge prices of US\$59.8/bbl.
